

**nCore** develops software for multicore processors

nCore engineers are experts at analyzing, optimizing and developing performance-tuned multicore applications. Our experience covers the sciences, earth and space exploration, national security, and the financial and consumer markets.

We use an agile engagement process enabling us to work closely with clients at an unprecedented level of speed and flexibility. nCore's far reaching capabilities and rigorous development methodology directly translate to improving your competitive edge in today's global marketplace.

sharing  
**expertise**

The background of the entire image is a dark, almost black, space filled with numerous glowing spheres of varying sizes and brightness. The spheres are rendered with a soft, ethereal glow, creating a sense of depth and movement. Some spheres are in sharp focus, while others are blurred, suggesting a vast field of light. The overall effect is one of a dynamic, multi-dimensional environment.

nCore Design is the leading provider of instructor-led, hands-on intensive training workshops focused on multi-core technologies.

Our passion for the art and science of high-performance software provide you with the solid theoretical foundations and experience to jump-start your next parallel project.

expanding  
**knowledge**

building **networks**

nCore's growing partner network and industry leadership allows us to deliver a complete solution combining best-of-breed technologies and a unique insight based on experience.

nCore is a working group member of the Multicore Association.

having  
**vision**

nCore Design develops high performance software and systems for multicore microprocessors, GPUs and embedded systems. nCore has significant expertise on wide variety of computing platforms and specialized knowledge of applied software optimization techniques. nCore is a leading provider of hands-on, instructor-led training courses focused on programming multicore and GPU microprocessors.

Founded in 2007, nCore Design is a privately held company with offices in the US and Japan. nCore works with local partners to deliver state-of-the-art solutions to multinational technology companies.
